Source: SCC census reports.

Historically, there have been more part-time students than full-time students attending SCC. However, this trend was reversed in the Fall 2007 (3,595 students attended full time and only 3,442 students attended part time). This change in direction can be seen by comparing the part-time and full-time bars in 2007 to the bars from the previous fall terms. Note also that the slope of the FTE line continues to increase at a linear rate.

Graph 10.2: Full-Time And Part-Time Headcount And FTE For Male Students Over Five Years

Graph 10.3: Full-Time And Part-Time Headcount And FTE For Female Students Over Five Years

Graph 10.2 shows a big increase in males attending full-time vs. part-time in 2007 than in previous years. Graph 10.3 shows that the percent of full-time females attending SCC is growing. Both trends account for why more full-time students are attending SCC than part-time students (Graph 10.1).
