

Presentations

An exciting dimension to round out learning in the classroom by sharing your work and life experiences while expanding the students' awareness of career paths.

Presentations include but are not limited to:

Sharing your organization with focus on career development.

Informing students on the skills and education they need to perform your job.

Encouraging the exchange of ideas, questions and information with students.

Your time is valuable!

That's why we ask that you commit only 2 hours of your time per experience, though you can certainly provide more if you wish. Also, to help you maximize the experience, we'll provide you with an orientation packet that includes Best Practices & Tips.

Career Explorations Alliance creates **job shadowing, mentoring, presentations** and **externship** experiences for students and educators in our community.

Because of you:

- Our future workforce will be better prepared to choose a career and be successful.
- Students will be able to create a better link to learning and earning.
- Organizations will be able to maintain a healthy pipeline of talent.
