CALCULATING YOUR GRADE POINT AVERAGE

Name: _____ ID:_____

Degree/Certificate: _____

Your grade point average (GPA) consists of the courses you have completed at St. Charles Community College. Transfer hours, AP Credit, and developmental coursework (lower than 100 level, i.e. MAT 098, ENG 096) do not count in your GPA.

Credit Attempted Cumulative total (CRD ATT CUM): credit hours used in calculating GPA; includes all classes completed at SCC except for developmental coursework

Grade Points (GRD POINTS): each letter grade is assigned a value

A = 4.0   B = 3.0   C = 2.0   D = 1.0   F = 0

The Grade Points (GRD POINTS) for a class are determined by multiplying this value by the number of credit hours for the course. Your cumulative GPA is calculated by dividing the total Grade Points (GRD POINTS) by the total GPA hours.

To determine the Grade Points (GRD POINTS), multiply value by credit hours of class.

Grade point value X Credit hours = Grade Points (GRD POINTS)

ENG 101	A	4.0	X	3	=	12.0
MAT 121	C	2.0	X	4	=	8.0
PHL 102	B	3.0	X	3	=	9.0
HIS 102	C	2.0	X	3	=	6.0
PSY 101	B	3.0	X	3	=	9.0

				16	=	44

To calculate your Grade Point Average (GPA), divide GRD POINTS by credit hours.

44.0	÷	16	=	2.75
GRD POINTS		**GPA HOURS**		**YOUR GPA!**

GPA GOAL WORKSHEET

	Grade Point Average	CRED ATT Semester Total	CRED ATT Cumulative Total	GRD Points
Total (cumulative) earned to date				

Calculate semester GPA needed to improve grade point average:

1. Add current semester hours (CRED ATT SEM) and total SCC credit hours earned to date (CRED ATT CUM).
2. Multiply that number by _____ (the desired cumulative GPA)
3. Subtract the total Grade Points earned to date (GRD POINTS)
4. Divide the answer in step 3 by current semester hours (CRED ATT SEM)

_____ + _____ = _____	X _____ = _____	- _____ = _____	÷ _____ = _____
CRED CRED	GOAL GPA	GRD	CRED TARGET
ATT ATT		POINTS	ATT GPA
SEM CUM			SEM
